*“Research in Mathematics Education:  
Battlefields and Beyond”*

**Wednesday**, February 13, 2007

Tea at 4:00 p.m. – Math Lounge, KINSC H208

Talk at 4:15 p.m. – KINSC Hilles 109

**Abstract:** This session will provide participants with an overview of the field of research in mathematics education. This will include a historical analysis of the "Math Wars" that have and continue to rage around the country. I will categorize some of the pressing questions and methodologies currently used in mathematics education research. Finally, I will share details about my own research findings, in the areas of probabilistic thinking and teacher learning.
